Information and Suggestions to Customers

AST season mail orders were received much earlier than usual owing to the fear of a seed shortage. It was a great satisfaction to seedsmen to receive these **early orders** as it was possible to fill them completely before some varieties became exhausted, as happens so often during the later rush.

We hope our customers will **mail orders early this season** as it gives us an opportunity to extend to them that little extra attention which means so much to a customer. Why not send the order **now** upon receipt of the catalogue?

Caution

¶ "Sterling Quality" Seeds are the highest grade obtainable and intended for the **particular** market gardener, florist and individual. **We do not sell to dealers.** "Sterling Quality" Seeds can be procured only directly from us.

“Sterling Quality” Seeds

(GARDEN, FIELD AND FLOWER)

Barn Equipment, Separators, Mechanical Milkers,
Farm and Garden Tools, Poultry and Dairy Supplies,
Plants, Bulbs, Fertilizers, etc., etc.

To Our Customers and Friends:

The boys are coming home — yes, in many cases they ARE home. Back again on the farms they left to answer the call of duty. How you have missed them and how you have labored early and late to plant, cultivate and harvest the crops without their help.

We cannot repay these splendid lads for their willing sacrifices and their enthusiasm which revived our allies and brought victory. But we can all of us make their paths a little easier by better performing OUR duties.

TRADE MARK

We therefore pledge ourselves to endeavor to give you all better service than ever before — to maintain the **quality** of Sterling Quality Seeds, and to strive to make of each customer a true friend.

"STERLING QUALITY" SEEDS MEAN THE BEST

BEET

Sow as early in the spring as the ground can be worked. For succession sow at intervals until the first of July. The soil should be well enriched with stable manure and plowed and harrowed until very fine. Sow in drills 15 inches apart and cover one inch. When well up thin out to 4 inches apart in the rows.

One ounce to fifty feet of drill; six pounds to the acre.

EARLY WONDER. A fine early variety, the market gardener's favorite on account of its symmetrical form, dark color, small top and early maturity. We buy our seed of the originator. Pkt. 10c., oz. 20c., 2 oz. 35c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

Crosby's Egyptian. The roots are flattened, globe shaped and very smooth. Exterior color of root bright red. The flesh is bright vermillion red, zoned with a lighter shade, very sweet, tender and of excellent quality. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.75.

Detroit Dark Red. The best beet for the market and home garden. Tops small, upright in growth. Root medium-sized, globular or nearly round, very smooth, and of dark blood red color. Very desirable for bunching. Uniform in growth and unsurpassed in quality. Pkt. 5c., oz. 15c., 2 oz. 30c., $\frac{1}{4}$ lb. 50c., lb. \$1.75.

Edmand's Blood Turnip. A medium early sort, deep red, popular with market gardeners. Our seed is grown from selected roots saved for seed. Pkt. 5c., oz. 15c., 2 oz. 25c., $\frac{1}{4}$ lb. 45c., lb. \$1.50.

EDMAND'S BLOOD BEET

EARLY WONDER BEET

Mangel Wurzel

Mammoth Long Red. This variety produces roots of mammoth size and is enormously productive. Yielding from thirty to forty tons per acre on well prepared land. Oz. 15c., $\frac{1}{4}$ lb. 40c., lb. \$1.25.

Kelway's "Best of All." The largest and best of all yellow mangels. An improvement on all stocks of Yellow Mangels, one of the heaviest croppers and of very fine quality. Oz. 15c., $\frac{1}{4}$ lb. 45c., lb. \$1.50.

Golden Tankard. Recommended for dairymen on account of its milk-producing properties. The flesh is a rich, golden yellow; very productive. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 45c., lb. \$1.50.

Lane's Imperial Sugar Beet. A hardy and productive variety; flesh snow white. Oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.25.

Swiss Chard or Spinach Beet

The leaves are used as greens and served like spinach. The mid-ribs may be cooked like asparagus. Cuttings may be used all summer, as it can be cut down to the ground and new shoots will soon spring up and make fast growth.

Lucullus. The largest and best. Pkt. 5c., oz. 15c., 2 oz. 30c., $\frac{1}{4}$ lb. 45c., lb. \$1.50.

Sugar Beets

Sow 6 lbs. to acre. Sow in May or June in drills 2 inches deep, about 2 feet apart; thin out to 10 inches apart.

Giant Feeding Sugar Beet, or Half Sugar Mangel.

A strain of beets very desirable for stock feeding, affording not only a very large crop much easier to harvest than other sorts, but also having a higher nutritive value, being especially rich in sugar. Roots light bronze green above ground, grayish white below, with white flesh. On account of growing partly out of the ground and the long ovoid shape, the crop can be harvested and stored easily and at less expense than any other root crop. Oz. 15c., $\frac{1}{4}$ lb. 45c., lb. \$1.50.

GIANT FEEDING SUGAR BEET, OR
HALF SUGAR MANGEL

Lane's Imperial Sugar Beet. A hardy and productive variety; flesh snow white. Oz. 15c., $\frac{1}{4}$ lb. 40c., lb. \$1.25.

BRUSSELS SPROUTS

Brussels Sprouts

Cultivate the same as cabbage. The sprouts resemble miniature cabbage and are very tender.

Improved Dwarf. A standard sort. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

Improved Long Island. The finest variety, very compact sprouts. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

Broccoli

A vegetable much resembling cauliflower.

White Cape. The most desirable variety. Pkt. 10c., oz. 50c.

CARROT

Carrots do best in a good, light and rich soil. Sow in April or May for the early crop, and for the main crop sow in May or June in drills about $\frac{1}{2}$ inch deep, in rows 14 inches apart, and thin plants to 3 or 4 inches in the rows.

OXHEART CARROT

One ounce to 100 feet of drill; four pounds to an acre.

Early Scarlet Forcing. The earliest variety for forcing, small round roots and excellent flavor. Pkt. 5c., oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

Early Scarlet Horn. A favorite early variety, of fine flavor and excellent for the table. Roots grow about three inches long. Pkt. 5c., oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

Danvers' Half-Long. The best sort for the main crop, dark orange color, growing very smooth, yielding large crops, and is a splendid keeper; roots medium length, tapering uniformly to a blunt point. Pkt. 5c., oz. 20c., $\frac{1}{4}$ lb. 60c., lb. \$2.00.

Danvers' Half-Long. Special Market Gardeners' Strain. Pkt. 5c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50.

Hutchinson. A superior strain of seed. Grow to a large size, small tap root and of the finest quality. Color a rich orange. Length, 8 to 10 in. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. 85c., lb. \$2.75.

Chantenay. A medium early, half-long variety. The flesh is crisp and tender. Pkt. 5c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75.

Improved Long Orange. Deep orange color, roots of large size and a good keeper. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 35c., lb. \$1.25.

Large Rooted. Pkt. 5c., oz. 35c., $\frac{1}{4}$ lb. \$1.25.

Cress or Peppergrass

Sow early in the spring on rich soil in drills 10 or 12 inches apart and make frequent sowings every two weeks. Cover seed about $\frac{1}{4}$ inch.

Extra Curled. Fine flavor, may be cut several times. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 35c.

Water Cress. Sow in the spring near the margin of ponds or running streams. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. \$2.00.

CABBAGE

The cabbage is an important crop and should be planted in fresh, rich soil, well manured and deeply dug or plowed. For early use sow in a hotbed in March, transplant to the open ground when danger from frost is past. Plant the early sorts about 18 inches in the rows and the late sorts about 2 feet in the rows and the rows about 3 feet apart. For the late crops sow in the open ground in June. Our cabbage seed is grown from selected stock and is equal to any offered in the market.

One ounce will produce about 2,000 plants.

COPENHAGEN MARKET CABBAGE

All Seasons. Large heads, round and very solid and sure heading; nearly as early as the Early Summer. Pkt. 10c., oz. \$1.00, $\frac{1}{4}$ lb. \$3.50.

A. S. & L., CAPE ELIZABETH.

Heads hard, solid, tender and crisp. It is remarkable for its long-keeping qualities. One of the best shipping varieties. Pkt. 10c., $\frac{1}{2}$ oz. 60c., oz. \$1.15, $\frac{1}{4}$ lb. \$4.00.

CAULIFLOWER

The soil that will grow cabbage will grow cauliflower. It should be made richer and thoroughly worked before planting. For the early crop sow the seeds in a hotbed in February or March and transplant to cold frames 2 or 3 inches apart each way. They should be planted in the garden early in May. For the late cauliflower, plant in the open ground in June and transplant in July.

One ounce will produce 2,000 plants.

CAULIFLOWER

Extra Early Dwarf Erfurt. Of dwarf growth with large, snow-white heads of regular shape; good for forcing. Pkt. 15c., $\frac{1}{4}$ oz. 90c., oz. \$3.00.

Earliest Dwarf Snowball. The earliest cauliflower in cultivation, absolutely sure to head when conditions are ordinarily favorable. Plants are very dwarf and of compact growth, with large, firm, snow-white heads. Pkt. 15c., $\frac{1}{4}$ oz. 75c., oz. \$2.50.

Thorburn's Gilt Edge. Produces large, solid, white heads of finest quality. Pkt. 15c., $\frac{1}{4}$ oz. 75c., oz. \$2.50

Danish Giant or Dry Weather. This variety is about two weeks later than the Snowball. It is of dwarf growth, producing large, hard and snow-white heads, fully protected by its foliage. Pkt. 15c., $\frac{1}{4}$ oz. 90c., oz. \$3.00

Veitch's Autumn Giant. A large, late sort. Pkt. 10c. $\frac{1}{2}$ oz. 30c., oz. 50c.

CELERY

For early celery sow the seed of the self-blanching sorts in a hotbed early in the spring. As soon as the plants are 3 inches high, transplant into frames in well-enriched soil 4 inches apart. Cut them once or twice before setting them out in May or June to make them stocky. When about six inches high transplant into trenches wide enough to hold two rows. The rows should be about 1 foot apart and the plants set about 8 inches apart. For winter celery start the seeds in flats as for early, only a little later. As the plants grow they should be earthed up to blanch, taking care not to cover the center of the plant.

One ounce of seed will produce about 4,000 plants

Paris Golden Self-Blanching. (French grown, special gardeners' strain). The finest early celery grown, easily blanched and of excellent flavor, solid and crisp. Pkt. 10c., $\frac{1}{4}$ oz. 40c., $\frac{1}{2}$ oz. 75c., 1 oz. \$1.25, $\frac{1}{4}$ lb. \$3.75.

PEAS

Sow the early, smooth, round sorts as early in the spring as the ground can be worked in light, dry, rich, loamy soil. The wrinkled varieties are more tender and the seed is more liable to rot and should not be planted when the ground is cold and wet. The late varieties do not require as rich soil as the early and dwarf sizes. Sow in rows 3 to 4 feet apart and about 1 inch apart in the rows, 3 to 4 inches deep. Peas grown as a market crop are never staked, but when the taller sorts are grown for private use they are generally sown in double rows, 6 to 8 inches apart, and staked with brush. For best results all garden peas require good, strong fertile soil.

One quart will plant about 100 feet of drill; 1½ bushels to the acre.

Those marked with a (*) are wrinkled varieties.

Our Pea Seed is hand picked and field rogued.

Pkts. 15c. each prepaid. If other quantities are wanted by mail, add at the rate of 5c. per pt., 10c. per qt.

Extra Early Varieties

Alaska. One of the earliest blue peas, pods dark green, of medium size and uniform in growth; height 2½ feet. Pkt. 15c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25.

***Gradus or Prosperity.** The earliest and most popular of the large-podded, wrinkled peas; vines vigorous, bearing large pods from 4 to 4½ inches in length, filled with large peas of the finest quality and delicious flavor; height 3 feet. Pkt. 20c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25.

***Laxtonian.** One of the most remarkable varieties yet introduced; very dwarf, growing only 12 to 15 inches high, producing pods in great abundance; nearly as large as the Telephone. The peas are large with a flavor the very sweetest and best. Pkt. 20c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25.

***Pioneer.** An improvement on the Laxtonian; it is claimed to be four days earlier; height 20 inches. Pkt. 20c., pt. 35c., qt. 60c., ½ pk. \$2.00, pk. \$3.50.

***Early Morn.** Of Gradus type, the pods are large and well filled with peas of excellent flavor; height 3 feet. Pkt. 20c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25.

***Little Marvel.** A dwarf variety of even growth, about 18 inches in height; pods dark green, medium size, often produced in pairs; as early as Nott's Excelsior or American Wonder, equal in flavor and more prolific. Pkt. 15c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25.

***Nott's Excelsior.** A splendid early sort; pods are always well filled with large peas of delicious flavor. The vines are more vigorous than the American Wonder; height 15 inches. Pkt. 15c., pt. 30c., qt. 50c., ½ pk. \$1.75, pk. \$3.25, bu. \$12.00.

Dwarf Gray Sugar (Edible Pods). Dwarf in habit, with small-sized pods. Pkt. 15c., pt. 35c., qt. 60c.

Mammoth Podded Sugar (Edible Pods). Large, broad pods; cooked as string beans, they are sweet and tender; height 4 feet. Pkt. 15c., pt. 35c., qt. 50c.

Black-Eyed Marrowfat. Largely grown as a field crop; height 4 feet. Pk. \$2.40, bu. \$9.00.

White Marrowfat. Very hardy and prolific; height 4 feet. Pk. \$2.40, bu. \$9.00.

White Canada Field. Valuable for sowing with oats for cattle feeding and for green soiling. Pk. \$1.50, bu. \$5.25.

RADISH

The seeds should be sown in light, rich, sandy loam. For an early supply, sow in a hotbed in rows 4 inches apart. Sow in the open ground as soon as the ground can be worked in rows 8 to 12 inches apart, ½ inch deep. If the radish makes rapid growth it will be crisp and tender. Sow every week or ten days for succession.

One ounce for 100 feet of drill.

Crimson Giant. An extra early, turnip-shaped variety, growing very large, yet never pithy, always hard and solid; good for forcing and equally as good if grown in the open ground. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

Early Scarlet White-Tipped. Small, round, red, short tops, crisp and tender. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

SCARLET GLOBE RADISH

Non Plus Ultra. The earliest forcing variety, round, red, maturing in about twenty days. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

Scarlet Globe. One of the best varieties for forcing or sowing in the open ground; globe shaped, scarlet color, crisp and tender. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

French Breakfast. Oblong shaped, color scarlet, white-tipped, rapid grower, mild and tender. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

Long Scarlet Short Top. Long and crisp, for frames or open ground. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

White Vienna. Finest white radish. It is long, slender, pure white, roots of excellent quality. Fine for forcing. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

WHITE VIENNA RADISH

Long Black Spanish. A good winter variety. Pkt. 5c., oz. 15c., ¼ lb. 45c., lb. \$1.50.

Salsify or Vegetable 'Oyster

One of the most delicious and nutritious of vegetables.

Sow early in the spring in drills 14 inches apart and 1 inch deep. Cultivate the same as for carrots and parsnips. They can be left in the ground until spring.

One ounce to 50 feet of drill.

Mammoth Sandwich Island. This variety grows to a large size and is superior in quality to the Long White. Pkt. 10c., oz. 25c., ¼ lb. 85c.

Ashmont Golden Flint Corn

Although the season of 1917 was the worst ever known by seedsmen for the proper curing of seed corn, yet Ashmont Golden Flint showed a germination test of 98%—a remarkable showing.

SPECIAL PREMIUM

A special premium of \$10.00 in cash will be paid by us for the best trace of 25 ears of "Ashmont Golden" grown from seed purchased of us, and shown at the Annual Exhibition of the Maine Seed Improvement Association held in 1919.

EA carefully chosen strain of the Stickney Flint. A fine ensilage corn, growing, under even fair condition, from 8 to 11 feet in height with a very heavy growth of luxuriant green leaves and stalks. By painstaking selection the time of maturity of this corn has been shortened from one to two weeks.

Seed grown exclusively for us by Dr. Henry H. Brock, its originator at the Ashmont Farm, Alfred, Maine.

Awarded first Premium at the annual exhibitions of the Maine Seed Improvement Association held at Bangor, 1914, Lewiston, 1915, Newport, 1917, and at Portland, 1918; also winner of the Sweepstakes and the Special.

A Descriptive List of

CHOICE FLOWER SEEDS

With General Directions For Cultivation

A rich, sandy loam is the best for most flowering plants. The soil of a good garden should be deep, well pulverized, and if fertilizers are used they should be thoroughly mixed with the soil.

It is best in practically all instances except hardy annuals to start the seed in boxes, preferably a box about 18 x 24 inches and 4 inches deep, using very sandy soil with leaf-mold that will not bake, and provide for drainage by boring some holes in the bottom of the box. It is best not to put any fertilizer in the seed box, since it is only necessary to bring the plants to the third or fourth leaf, when they should be pricked out and reset in another box, in which the soil should be loam mixed with leaf-mold. It is important that the plant be of good size, strong and sturdy, when finally transplanted in the garden.

If the seed be sown directly in the garden, it should be sown in the spring after the soil is well worked and fertilized. When up, the plants must be thinned from two to twelve inches, depending on the variety, otherwise they will be weak and spindling. It is a mistake to leave plants too thick. A common mistake in sowing flower as well as other seeds is covering too deep. As a general rule, cover only to the depth of the thickness of the seeds, or with medium-sized seeds, like Balsams, Zinnias, etc., half an inch or less is the proper depth. Such fine seeds as Portulaca, Nicotiana, etc., need only to be pressed into the soil with a piece of board or palm of the hand. Always press the earth down firmly after sowing all flower seeds, else there is danger of their drying up before the roots can get firm hold of the soil. Seeds of the hardier annuals may be sown where they are to grow; but, as a rule, it is preferable to transplant, as the plants are generally stronger and stand the drought better. During very dry weather, and when the seedlings are first set out, they should be watered frequently. Provide some support for all such annuals as require it.

The weeds should be kept down and the ground loosened often, so that the plants will receive the full benefit of the rains and dews, which they will not if the ground is allowed to become hard and baked.

ASTERS

A popular half-hardy annual produced in a great variety of classes and an almost endless number of colors. The tallest varieties grow about two feet high and some varieties of dwarfs are not six inches high. The best method of culture is to sow the seed in boxes in March or April. Cover the seeds about one-fourth inch deep with rich, light soil, and when the plants have three or four leaves transplant about 15 inches apart each way. The seed can be sown in rows where the plants are to remain, thinning them from six to twelve inches apart, according to variety. One of the best annuals for cut flowers.

NASTURTIIUM

NASTURTIIUM

A popular flower which is in constant bloom throughout the season, making a better display than almost any other plant. New colors are being developed, and in our list will be found all the best varieties that have been introduced.

Nasturtiums are of the easiest culture and require very little care after the seed is sown, merely weeding and the seed-balls picked off. If these are permitted to mature, the beauty of the plant is soon lost. Plant the seed one inch deep in moderately good soil. The tall sorts are specially adapted for covering unsightly fences or trailing over rocks and rough ground. Hardy annual.

**PANSY**

Pansies thrive best in a moist, shady location and in rich, loamy soil. Seed should be sown in the autumn for early spring blossoms. If sown in the spring, get it in as early as possible, so as to secure flowers during the early rains. Seeds sown in a cool place in May or June, and well watered until up, will produce fall-flowering plants. To have good flowers, the plants must be vigorous and make a rapid growth; use manure liberally.

ORDER EARLY TO AVOID DISAPPOINTMENT

SWEET PEAS

The popularity of Sweet Peas is demonstrated by the many and beautiful varieties that are introduced each year. Our list includes all the best up-to-date varieties.

Sow as early as the ground can be prepared in a deep, rich moist soil, in drills 6 inches deep, covering about 2 inches deep. As the vines grow, fill up the trenches with soil and thin out to about 4 or 5 inches apart. A popular plan at the present time is to sow in double rows with a trellis or a row of brush between.

GIANT SPENCER VARIETIES

The Spencers have very large waved flowers which are produced abundantly on long, strong stems, and are most desirable for cutting.

BUCKEYE INCUBATORS

No. 2 (STANDARD)

THE "STANDARD" HOT WATER HATCHING DEVICE

Every Buckeye "Standard" Incubator bears the Underwriters' Label of Approval.

During the past 25 years over five hundred thousand Buckeye incubators have been sold.

Buckeye incubators are equipped with every desirable device that can possibly add to incubator efficiency and they are sold with an absolute guarantee to hatch a chick from every hatchable egg.

Buckeye incubators are so simple that the beginner can operate them just as successfully as the experienced poultryman—that's why they are so uniformly satisfactory.

Newtown Giant Colony Brooder

"BUILT FOR LONG-
TIME SERVICE"

Shaking Grate—sliding door in Deflector raised.

The Great Time, Labor, Fuel and Chick Saver Coal-Burning, Self-Regulating, Simple, Safe and Economical.

Coal is recognized as the safest fuel to use to guard against the burning of property—the Newtown burns coal.

Every part of the Newtown Heater is cast iron with the exception of its heavy sheet metal casing around the fire bowl, which is a *special safety feature*. Air circulates between the heavy sheet metal casing and the hot fire bowl, which prevents over-heating of this part, so that there is no danger of the litter or buildings catching fire. The fire bowl is *not* exposed.

THE STANDARD COLONY BROODER

Self-Feeding, Self-Regulating, Simple, Safe, Everlasting

Saves Labor, Time and Money!

ABSOLUTE COMFORT FOR THE CHICKS. It is a well-established fact that every chick is not entirely comfortable in the same temperature—some require a little more heat, while others require less. Under the conditions provided by the Standard Colony Brooder, every chick can seek the precise temperature that suits it best. If it needs plenty of warmth it moves closer to the stove, and if it requires less heat it moves farther away from the stove. They follow the natural inclinations of nature.

IT IS ECONOMICAL, as it burns but three to six cents' worth of coal in a day. In ordinary cool weather it cannot burn more than three cents' worth of coal, and with the weather below freezing it cannot burn more than six cents' worth in a day.

THE INTERNATIONAL SANITARY HOVER

The Sanitary Hover can be used anywhere that there is protection for the chicks from wind and rain. It is not a center heat hover. It is warmest at the outer edge, which causes the chicks to distribute themselves near the curtain and prevents crowding and smothering the chicks.

It is a perfectly ventilated brooding device. It supplies plenty of fresh air for all the chicks, with no drafts. It can be carried around with ease and is ready for use wherever it may be dropped. No carpenter work is required to set it up—no cutting of holes nor building of platforms. All one has to do to set it up is set it down. A simple, safe, convenient, and dependable brooding device.—In fact the best oil-burning hover on the market. Capacity up to 100 chicks.

Price, \$10.00

THE LULLABY BROODER

Get away from the old idea that you should keep fifty chickens in a lot. You will make almost, if not quite, as much profit with twenty-five chickens raised in the "Lullaby" way as with fifty raised in the old-fashioned way.

They will make a great deal better use of food consumed, grow larger, hardier, and get to laying earlier, and once you plan your plant properly you can care for just as many in lots of twenty-five as you did formerly with fifty together.

It is not a question of how many chicks you put together in the spring that tells the profit later. It is "*How many did you raise out of every 100 hatched?*"

Banner Root Cutter

No. 7, Exclusively for Poultry

It cuts fast and is easy running. Leaves the feed in fine, brittle, ribbon-like strips that make choking impossible. Fowls large or small can safely eat the feed. The knives are adjustable and made of the very best of steel. An iron gate in bottom of hopper lets dirt and gravel escape before reaching the knives. In this cutter we offer the poultrymen a low-priced, high-grade, nicely finished and mechanically constructed machine. Two to five minutes will cut enough feed for a large flock of fowls. **Price, \$5.50.**

United States Poultry Fence

The United States Poultry Fence is galvanized after weaving and will not rust as Fencing galvanized before weaving.

The United States Poultry Fence has proven the best by test. It has long since established its superiority over other makes, and is in a class by itself. It is built to withstand *use and abuse* and is guaranteed to give satisfaction.

The United States Poultry Fence is strictly a "No-Sag" poultry fence, as the combination of line and mesh wires, closely woven, prevents any lengthening or narrowing between posts. In erecting United States Poultry Fence the line wires permit of being stretched to a high tension, which compels the fence to remain rigid and upright. These features place it a long stride beyond the Hex Mesh Netting, which never fails to narrow and lengthen if you attempt to stretch it to a tension required to prevent sagging.

Sexton's Dry Feed Hopper

**Easy to Fill. No Waste. Rat Proof.
Dust-Proof.**

The lower cover is so arranged that it is held up by locking the top cover of Hopper over same, and by raising the top cover the lower cover will fall in place.

This Hopper is arranged to hang on the wall the desired distance from the floor, and never need be removed from the wall to be refilled. It is impossible to waste any feed, as the pan at the bottom takes any feed that may be picked out and the last crumb can be used, therefore saving any waste. The body being covered keeps feed dust-proof and clean, and is always dry.

Body made of galvanized iron and the grating is of round galvanized wire, preventing the Poultry from cutting their bills. Price, \$1.50.

Conkey's Buttermilk Starting Food

In Conkey's Buttermilk Starting Food you get pure, rich buttermilk in dry powdered form, because Conkey's have found how to remove the great bulk of the water from ordinary buttermilk and still retain the valuable lactic acid with all its digestive and food values. In this dry powdered form, the buttermilk keeps in good condition and is always ready for use whenever a hatch comes off. It is mixed with a combination of clean, wholesome grains that form a balanced ration, just right for little chicks. This makes it a **COMPLETE STARTING FOOD** for the first three weeks, the most critical period of the chick's life, the time most chicks are lost and the time when egg-producing and other vital organs are forming that mean a profit-making bird or a mere boarder in later life.

The feeding of **CONKEY'S BUTTERMILK STARTING FOOD** will give you strong, active, vigorous and healthy chicks. One pound will feed twelve chicks for three weeks.

NORTH STAR WOOL FAT (Antiseptic Compound)

This natural skin-fat quickly heals scratched or chapped teats and relieves feverish or eaked udders. Dairywomen find that cows require less time to milk and "give down" more freely when their udders and teats are kept smooth, healthy and pliable by the frequent application of North Star Wool Fat.

Horse owners can prevent loss of valuable time during the busy season by the judicious use of North Star Wool Fat. It relieves:

Sore Shoulders
Wire Cuts
Collar Galls

Corns
Hard and Contracted Feet
Cracks

Skin Diseases
Thrush
Grease Heels

Applied to calves, pigs and lambs after altering, it protects and heals.

TO MODERNIZE YOUR FARM === LOUDENIZE YOUR BARN

The Louden Steel Stall gives the cow the same comfort and freedom of movement she would have in the field.

For fifty years Louden Hay Tools have been the world's standard for strength, simplicity and efficiency.

Your time is too valuable to be spent pushing a wheelbarrow. A Louden Overhead Litter Carrier solves the problem.

We Can Fit Up Your Barn Complete With Louden Modern, Sanitary Equipment

Louden equipment makes possible a clean, sanitary barn with a minimum of expense for upkeep.

When cows are transferred from dark, insanitary shelters to light, well ventilated, well equipped barns of the Louden type the milk flow invariably increases from 10 to 25 per cent., and the labor of caring for the herd is reduced by one-third or one-half.

The cost of installing Louden equipment is surprisingly small, and it is just as great an economy for the man with half a dozen head of cows as for the man who has to care for hundreds of animals. The percentage of labor saved is the same, and in either case it is 100 per cent. profitable.

We are prepared to quote you attractive prices on everything for your barn. The items illustrated are only a few products of the largest and most complete line of barn equipment made. Some of these products we carry in stock; others we can secure for you promptly.

Going to Build or Remodel a Barn?

If so we shall be glad to secure for you, free of cost to yourself, a copy of Louden's \$1.00 book of barn plans. It's the most valuable collection of practical plans and dollar-saving building information ever published. Contains more than 50 plans, with complete description and estimated cost of construction.

It is yours for the asking.

See us or write us in regard to your barn problems. We shall be glad to assist you, and to quote you lowest prices on your complete equipment.

THE LOUDEN LINE INCLUDES

- Hay Tools
- Stalls and Stanchions
- Steel Pens
- Litter Carriers
- Feed Carriers
- Feed Trucks
- Door Hangers
- Horse Barn Equipment
- Cupolas and Ventilators
- Water Bowls
- Specialties

The Louden Tubular Steel Stanchion is the strongest, most comfortable cow tie made.

Louden Sanitary Steel Pens are made for cows, calves, bulls, sheep and hogs.

The time and feed you waste in a year would pay for a Louden Feed Truck.

If in doubt let us show you barns we have Loudenized.

For Dairies, Creameries, Etc.

For cleaning vats, pasteurizers, strainers, cans, pipes, separators, and other articles in your plant that have become gummy or tainted with stale odors by the use of soap, soap powder, or some similar washing compound, there is nothing that accomplishes this task so easily, and at such little expense as Wyandotte Dairyman's Cleaner and Cleanser. A daily washing of the dairy or factory equipment will keep everything sweet and clean!

As you may already know, Wyandotte Dairyman's Cleaner and Cleanser is used by four out of every five butter and cheesemakers and by thousands of milk producers. It is the only cleaner recommended by State Dairy College Authorities. We know you will not be without it once you give it a thorough trial, and know what it does, and how little it costs to use.

Hotels and Restaurants

Wyandotte Sanitary Cleaner and Cleanser when used for dish washing not only makes the dishes cleaner and brighter than is possible where soap is used, but it also makes the work easier. The same is true in the home.

Drain pipes, sinks, refrigerators, etc., are always kept free and open when Wyandotte Sanitary Cleaner and Cleanser is used.

As a deodorizer and cleaner of everything about the hotel or home it is unsurpassed. We guarantee every claim and you assume no risks or fear of disappointment when you use Wyandotte Sanitary Cleaner and Cleanser.

Wyandotte Detergent

can be used to advantage in cases
where a combined abrasive and
cleaner are needed

Wyandotte Detergent is quite different in its nature from the "Wyandotte" Dairy or Sanitary Cleaner. It contains a fine, flaky grit which makes it an abrasive and scourer. It also has the freshening and sweetening properties of the other "Wyandotte" products.

For cleaning marble, tile, painted walls, and other similar surfaces Wyandotte Detergent is unsurpassed. It scours clean, but does not scratch, mar or dull.

Rusty ice cream cans are easily scoured clean with Wyandotte Detergent, and although Wyandotte Detergent is not a metal polisher, for cleaning corroded iron and brass pipes, railings, dirty sinks, urinals, cuspidors and the like it has no equal.

No. 31 Planet Jr. Combined Drill Seeder and Single Wheel Hoe

Price, Complete, \$13.00

No. 32 as a Drill Seeder
Only \$10.50

This new tool is of great value to gardeners who have never felt able to own either a seed drill or a wheel hoe. It will sow even a small packet of garden seed with great precision. Quickly changed to a splendid wheel hoe. A special machine for the small gardener.

No. 3 Planet Jr. Hill and Drill Seeder

Price, \$18.50

Holds 3 Quarts of Seed

A favorite among onion growers, market gardeners and seedsmen.

No. 25 Planet Jr. Combined Hill and Drill Seeder, Double Wheel Hoe, Cultivator and Plow

Price, \$25.00

A splendid combination for the family garden, onion grower, or large gardener. It is a perfect seeder, and combined double and single wheel hoe.

No. 12 Planet Jr. Double and Single Wheel Hoe

Price, \$12.50

A single and double wheel hoe in one. Straddles crops till 20 inches high, then works between. Has steel frames and 14-inch steel wheels.

No. 33 Planet Jr. Single Wheel Hoe

Price, \$6.50

This combination will delight the suburbanite, the growing boy, women, younger or older, who will find it a light running wheel hoe that will save them hard work and

help much to supply the table with fine vegetables.

Planet Jr. Garden Tools

We offer these Tools as the highest type of their class. They have a great variety of attachments which adapt the implements to a large variety of work, and there is scarcely any garden culture of which they are not capable.

No. 16 Planet Jr. Single Wheel Hoe, Cultivator, Rake and Plow

Price, \$10.50

The highest type of Single Wheel Hoe made. Light, but strong, and can be used by man, woman or boy. Will do all the cultivation in your garden in the easiest, quickest, and best way.

Nos. 16, 17, and 17½ wheels, frames and handles are alike, but the attachments sold with each vary.

No. 17 Planet Jr. Single Wheel Hoe

Price, \$8.75.

The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth.

No. 17½ Planet Jr. Single Wheel Hoe

The pair of 6-inch hoes, three cultivator teeth and leaf lifter which go with it, are all the finest of their kind.

No. 19 Planet Jr. Single Wheel Hoe, Cultivator and Plow

Price, \$6.25
15 in. Steel Wheel

This attractive implement is especially designed for the farmer's garden work, though it offers to every one with either field or garden a cheap and effective tool for wheel-hoe operations. The high wheel makes easy prunning.

No. 8 Planet Jr. Combined Horse Hoe and Cultivator

Price, with Steel Wheel,
\$20.00

Equipment: Four 3x8-in. plates, one 4x8-in. plate, two 6-in. side hoes, one 7-in. shovel, lever wheel, lever expander. Depth regulator.

This is a general favorite, being easily understood and operated. The tool is especially strong, being braced so as to make a stiff, unyielding tool intended for long service.

No. 9 Planet Jr. Combined Horse Hoe

Price, with Steel Wheel, \$17.25.

This Horse Hoe is identical with No. 8, except that it has no depth regulator and a plain wheel instead of lever wheel.

No. 9 Planet Jr. Plain Cultivator

Price, with Steel
Wheel, \$15.00

A light and strong tool, having improved patent hollow steel standards, parallel and extra high steel frame, patent lever expanders, handle braces and side adjustments for handles. Used with or without a wheel, the wheel being preferred.

FIRE-FLY GARDEN PLOW

This tool is exceedingly useful to owners of small gardens. It will throw a furrow four to six inches wide and one to three inches deep, and deeper by going a second time in each furrow. Chicken raisers find it of great advantage in plowing up their scratching yards.

Price, \$4.00

Planet Jr. Garden Tools

No. 91 Planet Jr. Twelve-Tooth Harrow

Price, with Steel Wheel,
\$15.00.

Gardeners cultivate better than formerly. It has been found to pay best. With the Twelve-Tooth Harrow you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.

No. 76G Planet Jr. Pivot Wheel Riding Cultivator

Weight, 531 lbs.
Fitted with
Spring-trip Standards
Price upon application

The No. 76G combines nearly all the advantages of other Planet Jr. riding cultivators. The combination of the best parts of these tools in one would seem to make a machine which would be without a rival in popularity and usefulness. The arch is high, frame and tongue are of steel and the change in width of the wheels is all that could be desired. It has powerful levers, and the gang frame is strong. The standards are adjustable for depth, and to throw to or from the row. The extra wide arch is very desirable. The draft is arranged to insure satisfactory work in all conditions of soil.

The Climax Single Wheel Cultivator

A sturdy, high grade, low priced garden cultivator with extra large wire spoke wheel.

Equipment consists of one double end cultivator tooth, one plow, one 11" sweep or coverer and one four-tooth rake.

Sheep's Head Brand Pulverized Sheep Manure

A complete natural fertilizer, supplying all the necessary plant food elements—Nitrogen, Phosphoric Acid and Potash—in combination with organic matter or humus, and it is this natural combination that produces the peculiar action and effect in the soil which can only be had from animal manures. It can be used without fear of weeds and foreign grasses that always follow the application of ordinary stable manures.

For the lawn there is nothing better than sheep manure, and its convenience makes it the logical fertilizer. There is no straw or other refuse in it as is always the case with crude manures. Barnyard manure should never be applied to a lawn, as it usually contains seeds of noxious weeds, which germinate and grow. A few weeks will show surprising results.

Its use on the vegetable garden will double the yield and insure better vegetables, also hurry the growth for earlier table use. Probably the best way to use it is to scatter it broadcast harrowing or raking it lightly but reserving a little to use in the hills or drills. Then the young plants will have some nourishment close at hand to give them a good start.

Sheep manure is probably more largely used in greenhouse growing of flowers and vegetables for market than any other fertilizer, because it is safe, and can be relied upon for quick, sure results. It is unequalled for either dry or liquid top-dressing, especially for carnations, chrysanthemums, asters, and other hardy floral crops.

Price, \$7.00

Ideal Tractor Lawn Mower

“A combination lawn mower and roller so simple in design and reliable in operation that it is sold under a guarantee to give satisfaction. It is a great labor saver as it will do the work of five men with hand mowers. It has a 30" cut and weighs about 550 pounds. We will be glad to mail literature, quoting prices if you are interested.”

The Skinner System of Irrigation

There are times in nearly every growing season when a crop could be saved or its value doubled if the grower could call down from the skies a soft, gentle rain of sufficient duration to abundantly water the crop. With the Skinner System of Irrigation the rainfall is at the command of the grower.

Not only will the Skinner System protect, against drought but it will distribute the water with a uniformity not otherwise possible. The moisture is applied in the way which is most advantageous to the soil and to the crop, without injury to the plant. Commercial fertilizers, insecticides and fungicides can be distributed through the Skinner System. All of this is accomplished with a minimum of labor. The early maturity of the crop, securing the advantage of better prices, and the more luxuriant and uniformly developed growth mean greater returns per acre.

DUNHAM "WATER-WEIGHT" ROLLER

The Dunham "Water-Weight" Roller is electric welded, making the water section one solid drum. No rivets are used. It cannot leak. The rolling surface is perfectly smooth, and cannot cut up the lawn. They are roller bearing and easy to operate. Made in one section, as shown in cut, or with two sections. The handle lock attachment locks the handle to the drum when the roller is not in use, so that the handle remains upright.

Eureka Fruit Jars

THE PERFECT JAR

Eureka Jars have **straight sides**, as large at the mouth as it is at the bottom, making it easy to fill and easy to empty. No dirt collecting shoulder. **Rubber ring** goes on the cover instead of on the jar, so that housewife has cover all ready to put right on the jar when ready to seal.

Whole fruits and vegetables can be easily packed in the Eureka owing to there being no shoulder.

It is more than a fruit jar for it is good for all kinds of canning, whether fruits, vegetables, fish or meats. 1 Pint—1 Quart.
